OCTOBER 2004 NEWSLETTER

UPCOMING MEETINGS

October 11  6:00pm  Potluck Dinner and Slide show of The La Marmotte French Alps Ride.
This meeting will be held at Rich Harris’s home, 101 Breezewood Terrace, Bridgewater. There will be a potluck dinner beginning at 6:00pm. Bring a dish to share with others and the beverage of your choice. The Club will provide dessert. After a brief meeting at 7:00, Rich will show a slide show of his summer La Marmotte ride in the French Alps. See his story elsewhere in the newsletter. To help with the set up for the meeting, please e-mail Rich at harrisra@jmu.edu to let him know if you are coming. Hope to see you there!

SEPTEMBER MEETING MINUTES

The September 13th meeting of the SVBC was held in Luigi’s backroom. There were eight members present. The treasurer reported a balance of $8,038.80, less $1,100 still in the treasury for jerseys. The jerseys are in and most have been picked up, some in time for the Century. If you haven’t gotten your jersey see Rich Harris ASAP.

The Century wrap up meeting and Alice’s farewell took place at Art’s house on Wednesday September 22nd. Volunteers were thanked as well as special thanks to the Century director Art, Robin the food coordinator, and Neups, Robin’s assistant and all round go-for. Alice Stecker was also recognized for her years of Club participation. She will be moving to her (not a) retirement home near Asheville, NC. Thanks, Alice, enjoy your free time. Anyone with suggestions, comments, or criticism concerning the Century, please give them to Art so he can address them.

The Margaret D. Palmieri Rural Health Scholarship Fund acknowledged the Club’s donation. Maggie was killed during the 2003 Mountain Mama and her husband Jim established this scholarship to assist in rural health care. He felt if Maggie had received prompt medical attention she may have survived. The fund keeps Maggie’s memory in cycling through the Mountain Mama.

October 16th is the Club’s trash pick-up day. This October we begin with pick-up along Amberly Road in western Rockingham County just outside the city. This is a road we ride frequently that connects Mt. Clinton Pike to Fort Lynn Road. Come join us for a quick hour of work, then ride afterwards. For more information contact Neups.

The next meeting (October 11th) will be at Rich Harris's house with a pot-luck supper and slides of his trip to France. Contact Rich for details.

The meeting was adjourned.

Respectfully submitted,
Marshall Hammond
Secretary SVBC

WANNABES

Many of us are avid riders, but can't hang with the fast dogs. This monthly social ride is for you! It will be an opportunity to improve your skills and strength by riding with some experienced people. The rides will generally be flat and of varying lengths (usually 15 to 25 miles) depending on participant experience. No one will be dropped. Our goal is to have fun while we gain experience. Unless otherwise noted in the monthly ride schedule we will meet on the 3rd Sunday at 9:00 am to avoid the hot weather. Call Scott Ripley (248-5810) for more information.

TIDBITS

The Club has been thanked by the Margaret D. Palmieri Rural Health Scholarship Fund for our contribution. She was the woman who lost her life on during a recent Mountain Mama.

VIRGINIA LT. GOV. OFFERS TRAFFIC SOLUTIONS

According to a Sept. 19th Daily Progress article, "Localities and the state need to work together if they are to develop a sustainable transportation network, Lt. Gov. Timothy M. Kaine said Saturday at the annual meeting of the Piedmont Environmental Council. The group, dedicated to protecting the Virginia Piedmont's rural economy and natural resources, held a joint conference with the Virginia Conservation Network at the Barboursville Winery in Orange County.

"The conference, themed Reconnecting Virginia, aimed to find a solution to Virginia's growing traffic problems. The key to this, Kaine said, is melding land use and transportation planning. 'You have a challenge in that a state transportation planning process is trying to keep up with the uncoordinated decisions of 134 cities and counties,' he said. 'One of the things we have to do is 'put land use and transportation together.'""

KRYPTONITE

In case you haven't heard, u-locks with cylindrical keys can be picked with a Bic pen. See [http://www.bikeforums.net/showthread.php?t=66128&page=1&pp=25](http://www.bikeforums.net/showthread.php?t=66128&page=1&pp=25) for details.

According to a Sept. 23rd Oakland Tribune article, "Bike lock maker Kryptonite is offering to exchange its tubular u-shaped locks for free, in response to a design flaw that allows thieves to open the locks with the hollow shaft of a ball point pen. Kryptonite said 'all consumers who are concerned about the security of their current Kryptonite tubular cylinder locks' will be able to exchange the locks for a non-tubular cylinder model. The company said it will begin exchanging products within a few weeks as new locks are made available.

"The company previously said it would offer free upgrades to customers depending on when they bought the affected locks. 'We decided to simplify and expand our planned product upgrade program so that we could expedite the process for consumers and eliminate any lingering doubt in their minds about their locks,' company general manager Steve Down said. 'Standing by our customers is the responsible thing to do for those who rely on our security products to keep their valuables safe.'"

Kryptonite has moved quickly to supply a solution. If you own one of its many vulnerable U-locks, you can get a free or discounted crossbar that isn't so easily picked. The details are at [www.kryptonite.com](http://www.kryptonite.com).

CHAIN-WEAR CHECK

from [www.RoadBikeRider.com](http://www.RoadBikeRider.com)

So you've been riding with the same chain for ages, and wonder if it's time for a replacement. There are several ways to ID a worn chain, Here's the best! First, shift onto the large chainring. Kneel at the right side of the bike. Using a 12-inch ruler, hold it along the bottom run of chain (between the lower derailleur pulley and chainring). Put the ruler's first mark on the center of any link pin. Then look at the 12-inch mark. On a new chain, that mark will also be on the center of a pin. If the mark falls short of a pin, the chain is somewhat worn. If it's 1/8 inch or more short, it's so worn that it should be replaced. Remember, milking more miles out of a shot chain is a sure way to make the chainrings and cogs wear faster. That gets expensive.
